

**Amendment to the Abstract:**

The Abstract has been amended. A revised Abstract is attached.

**ABSTRACT**

~~The invention presents a~~ A program information display device is capable of using an electronic program guide using arbitrary attributes as axes of scatter diagram displaying program information, and allowing to find a desired program easily. ~~This is also to present~~ Also, a program information display device ~~having~~ has an electronic program guide capable of displaying program information at high degree of freedom without restriction of discrete layout. The program information display device is a program information display device for displaying program information in a scatter diagram disposed at a position conforming to related value about attribute of X-axis and related value about attribute of Y-axis, comprising program information ~~storing means~~ storage, program information processing ~~means~~, program information display ~~means~~, and attribute input ~~means~~.
